

Walsworth Actions- These actions are prepared to automate image adjustments in Photoshop. They should be used with caution, as each image requires (deserves) to be treated based on it's own needs/merits. There are other tools within Photoshop such as Auto Levels that uses Photoshop technology to review and adjust each image.

Adjusts the midtown range of an image so it will print lighter.

Adjusts the midtown range of an image so it will print darker.

Converts RGB images to Auto balanced CMYK color image.

Converts RGB image to Auto balanced Grayscale image.

Walsworth

These Photoshop actions are provided as a suggestion on image correction and adjustment. The use of these actions by no means guarantees your image correctness or obligates Walsworth in any way.
